Landowner Management Objectives

1. Protect & manage the property for all attributes and opportunities that exist in a healthy forest ecosystem. This includes: recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. Reduce the impact of non-native invasive species in the native plant community.
3. Improve the forest land by implement various silvicultural activities, such as: tree planting, crop tree release, establishing native fauna and improving wildlife habitat.

General Woodland Description

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Athens County is in the central hardwood forest region. Major forest types include Appalachian hardwoods, bottomland hardwoods, oak-hickory, successional, Virginia pine, and white pine plantations. Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees

Kate & Willem began purchasing property along the Brawley Road area in 1995. After numerous acquisitions of tracts over the years, in 2011 they formed an LLC in the name Terrapene Terrace LTD. They were recognized as outstanding stewards of the land in 2014 by the Athens County SWCD.
