

Woodland Stewardship Management Plan

Owner Timothy C. Lavelle DDS
Address 207 Columbus Road
Athens, Ohio 45701
Phone _____ Case Number _____
Cell 740-448-6684 Email Address coonskinmaplesyrup@gmail.com
County Athens Township/Village/City: Ames Twp. Sec 8,9 14 & 15
Parcel(s): See attached sheet for the 17 Parcel ID numbers
Location: At junction of State Route 550 and Brawley, near Amesville Ohio

Woodland Stewardship Acreage: 436.0 Non-woodland Stewardship Acreage*: 79.36
Total Property Acres 515.36 * Non-woodland acres for which stewardship recommendations are made. Stands: 11, 13, 18, 20, 21, 24, 28

This plan was written to qualify the landowner's woodland for the programs checked below:

- Ohio Forest Tax Law American Tree Farm Program
 Environmental Quality Incentives Program (EQIP) CAUV Tax Reduction

Property coordinates (report in WGS 84, degrees, min., sec.)

Latitude: N 39.394621 Longitude W -81.974195

Landowner Management Objectives

1. Protect & manage the property for all attributes and opportunities that exist in a healthy forest ecosystem. This includes: recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. Reduce the impact of non-native invasive species in the native plant community.
3. Improve the forest land by implement various silvicultural activities such as: tree planting, crop tree release, establishing native fauna and improving wildlife habitat.

General Woodland Description

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Athens County is in the central hardwood forest region. Major forest types include Appalachian hardwoods, bottomland hardwoods, oak-hickory, successional, virginia pine, and white pine plantations. Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees

Stonewall Tree Farms has been owned by various family members since the 1930's, with Tim being the current owner. This farm became a certified tree farm in 1991. It was recognized as the Ohio Tree Farm of the Year in 2013. This farm is home to the *Coonskin Sugar Bush*, as well as *Liv'en on the Edg* custom live edge furniture and slabs. Utilizing the dying ash trees has been an ongoing operation for the last few years. Athens SWCD recognized Stonewall Farms as Forestry Cooperator of the Year in 2015. This farm is a true reflection of multi-generational stewardship of our natural resources..

Recommended Management Activity Schedule

Year(s) Suggested	Mgmt. Unit	Required Task?	EQIP Practice?	Acres	Recommendations
2020 and again in 2025 & 2030	all	<input type="checkbox"/>	<input type="checkbox"/>	NA	Recommend painting property lines in wooded areas to help prevent illegal trespass- remark every 5 years or as needed to be easily visible. If CAUV Forestry application is filed -this must be completed. (not ag requirement)
2021 -2024	5pt, 7 & 8	<input type="checkbox"/>	<input checked="" type="checkbox"/>	1-2 ac Ail 15 ac Vines & invasive species	Eradicate Ailanthus in this area, cover entire stand looking for additional infested areas. Grapevines -at minimum cut grapevines from the "crop" trees. If EQIP- will need to cut all vines – light infestation and then treat non-native invasive species
2022 -2026	3pt, 4 pt, 5pt & 6	<input type="checkbox"/>	<input checked="" type="checkbox"/>	13ac total	Work on eradicating non-native invasive species like Autumn Olive/Bush Honeysuckle/Privet /Barberry/G.M.from the wooded area. At minimum -pick an area and cut & treat the "fruit bearing" sized shrubs – over time cover entire tract & cut grapevines from "crop" trees If EQIP- will need to cut all vines (leave a few wildlife arbors) – light/ infestation and then treat non-native invasive species- medium/heavy infestations
2023- 2029	2,3pt,4pt 5pt	<input type="checkbox"/>	<input type="checkbox"/>	13ac total	Work on eradicating non-native invasive species like Autumn Olive/Bush Honeysuckle/Privet /Barberry/G.M.from the wooded area. At minimum -pick an area and cut & treat the "fruit bearing" sized shrubs – over time cover entire tract & cut grapevines from "crop" trees If EQIP- will need to cut all vines (leave a few wildlife arbors) – light/ infestation and then treat non-native invasive species- medium/heavy infestations
2020-2030	4 & 6	<input type="checkbox"/>	<input type="checkbox"/>	2-3ac	Maintain/Develop food/pollinator plots in these areas. Possible plantings of fruit & mast producing trees
2025 & 2030	Whole Property	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Next Site Visit – Woodland reviews are recommended at least once every five years, and no more than ten years, based upon the date of the last actual woodland evaluation conducted by your forester	

Timber Harvesting Recommendation

Before entering a timber sale agreement, or conducting other forestry work that is not listed in your activity schedule, contact your forester first to ensure compliance with your approved woodland stewardship management plan
