

Donaldson Property – CAUV Woodland Stewardship Management Plan

Owners: Daniel R. & Rebecca M. Donaldson
Address: 14234 E. Scatter Ridge Road
Athens, Ohio 45701
Phone: 740-448-6551
County: Athens Township: Canaan Section No. 25
Parcel ID: E010010040100
Woodland Stewardship Acreage: 52.58 Non-woodland Stewardship Acreage*: .0 ac.
Total Property Acres 55.68 * Non-woodland acres for which stewardship recommendations are made.

This plan was written to qualify the landowner's woodland for the programs checked below:

- Ohio Forest Tax Law American Tree Farm Program
 Environmental Quality Incentives Program (EQIP) CAUV

Property coordinates (report in WGS 84, decimal degrees.)

Longitude: N 39.362511 Latitude: W-82.018739

LANDOWNER OBJECTIVES

1. PROVIDE FOR SUSTAINABLE TIMBER & FIBER PRODUCTION
2. RESTORE NATURAL HABITAT AREAS & PROMOTE NATURAL VEGETATION
3. PROTECT SOIL AND WATER RESOURCES
4. PROTECT PROPERTY FROM INVASIVE SPECIES, PESTS & DISEASE
5. ENJOY RECREATIONAL USE OF PROPERTY
6. ENHANCE WILDLIFE HABITAT
7. PROTECT SCENIC BEAUTY, OPEN SPACES & RURAL CHARACTER OF REGION
8. PROMOTE STEWARDSHIP & ENHANCEMENT OF CONSERVATION VALUES

General Woodland Description

This forested property is a mix of upland eastern hardwoods that lies in the unglaciated East Hocking, Appalachian & Allegheny Plateaus. These common hardwood forest types are found along ridge-tops, coves, ravines and along steep slopes that extend through-out the Appalachian Mountains and foothills. Stands are generally characterized by a large number of dominant and co-dominant tree species and by the great diversity of their mixture. The species and their proportions vary considerably because of lack of previous forest management, differing past treatments, earlier timber harvests and/or natural stand disturbances on sites of differing quality, aspect, elevation and latitude.

In almost all of the stands the woodland shows the result of years of no forest management and damage from grapevines and from past cuttings without proper planning for future timber crops. This has resulted in some stands with a lack of desirable tree species. However, in other areas stocking rates of acceptable tree species are more than adequate to maintain appropriate stand density, tree spacing and basal area levels for high quality saw-timber production.
