|---|---|
| <input type="checkbox"/> Ohio Forest Tax Law  | <input type="checkbox"/> American Tree Farm Program             |
| <input checked="" type="checkbox"/> Environmental Quality Incentives Program (EQIP) | <input checked="" type="checkbox"/> CAUV Property Tax Reduction |

Property coordinates (report in WGS 84, decimal degrees.)

Longitude: 39.427005 N Latitude: -81.945989 W

### *Landowner Management Objectives*

1. Manage the property for all attributes and opportunities that exist in a forest ecosystem of interest to the owner including recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. Improve the productivity of this farm for the future generations. Maintain the forest land in a productive and healthy condition.

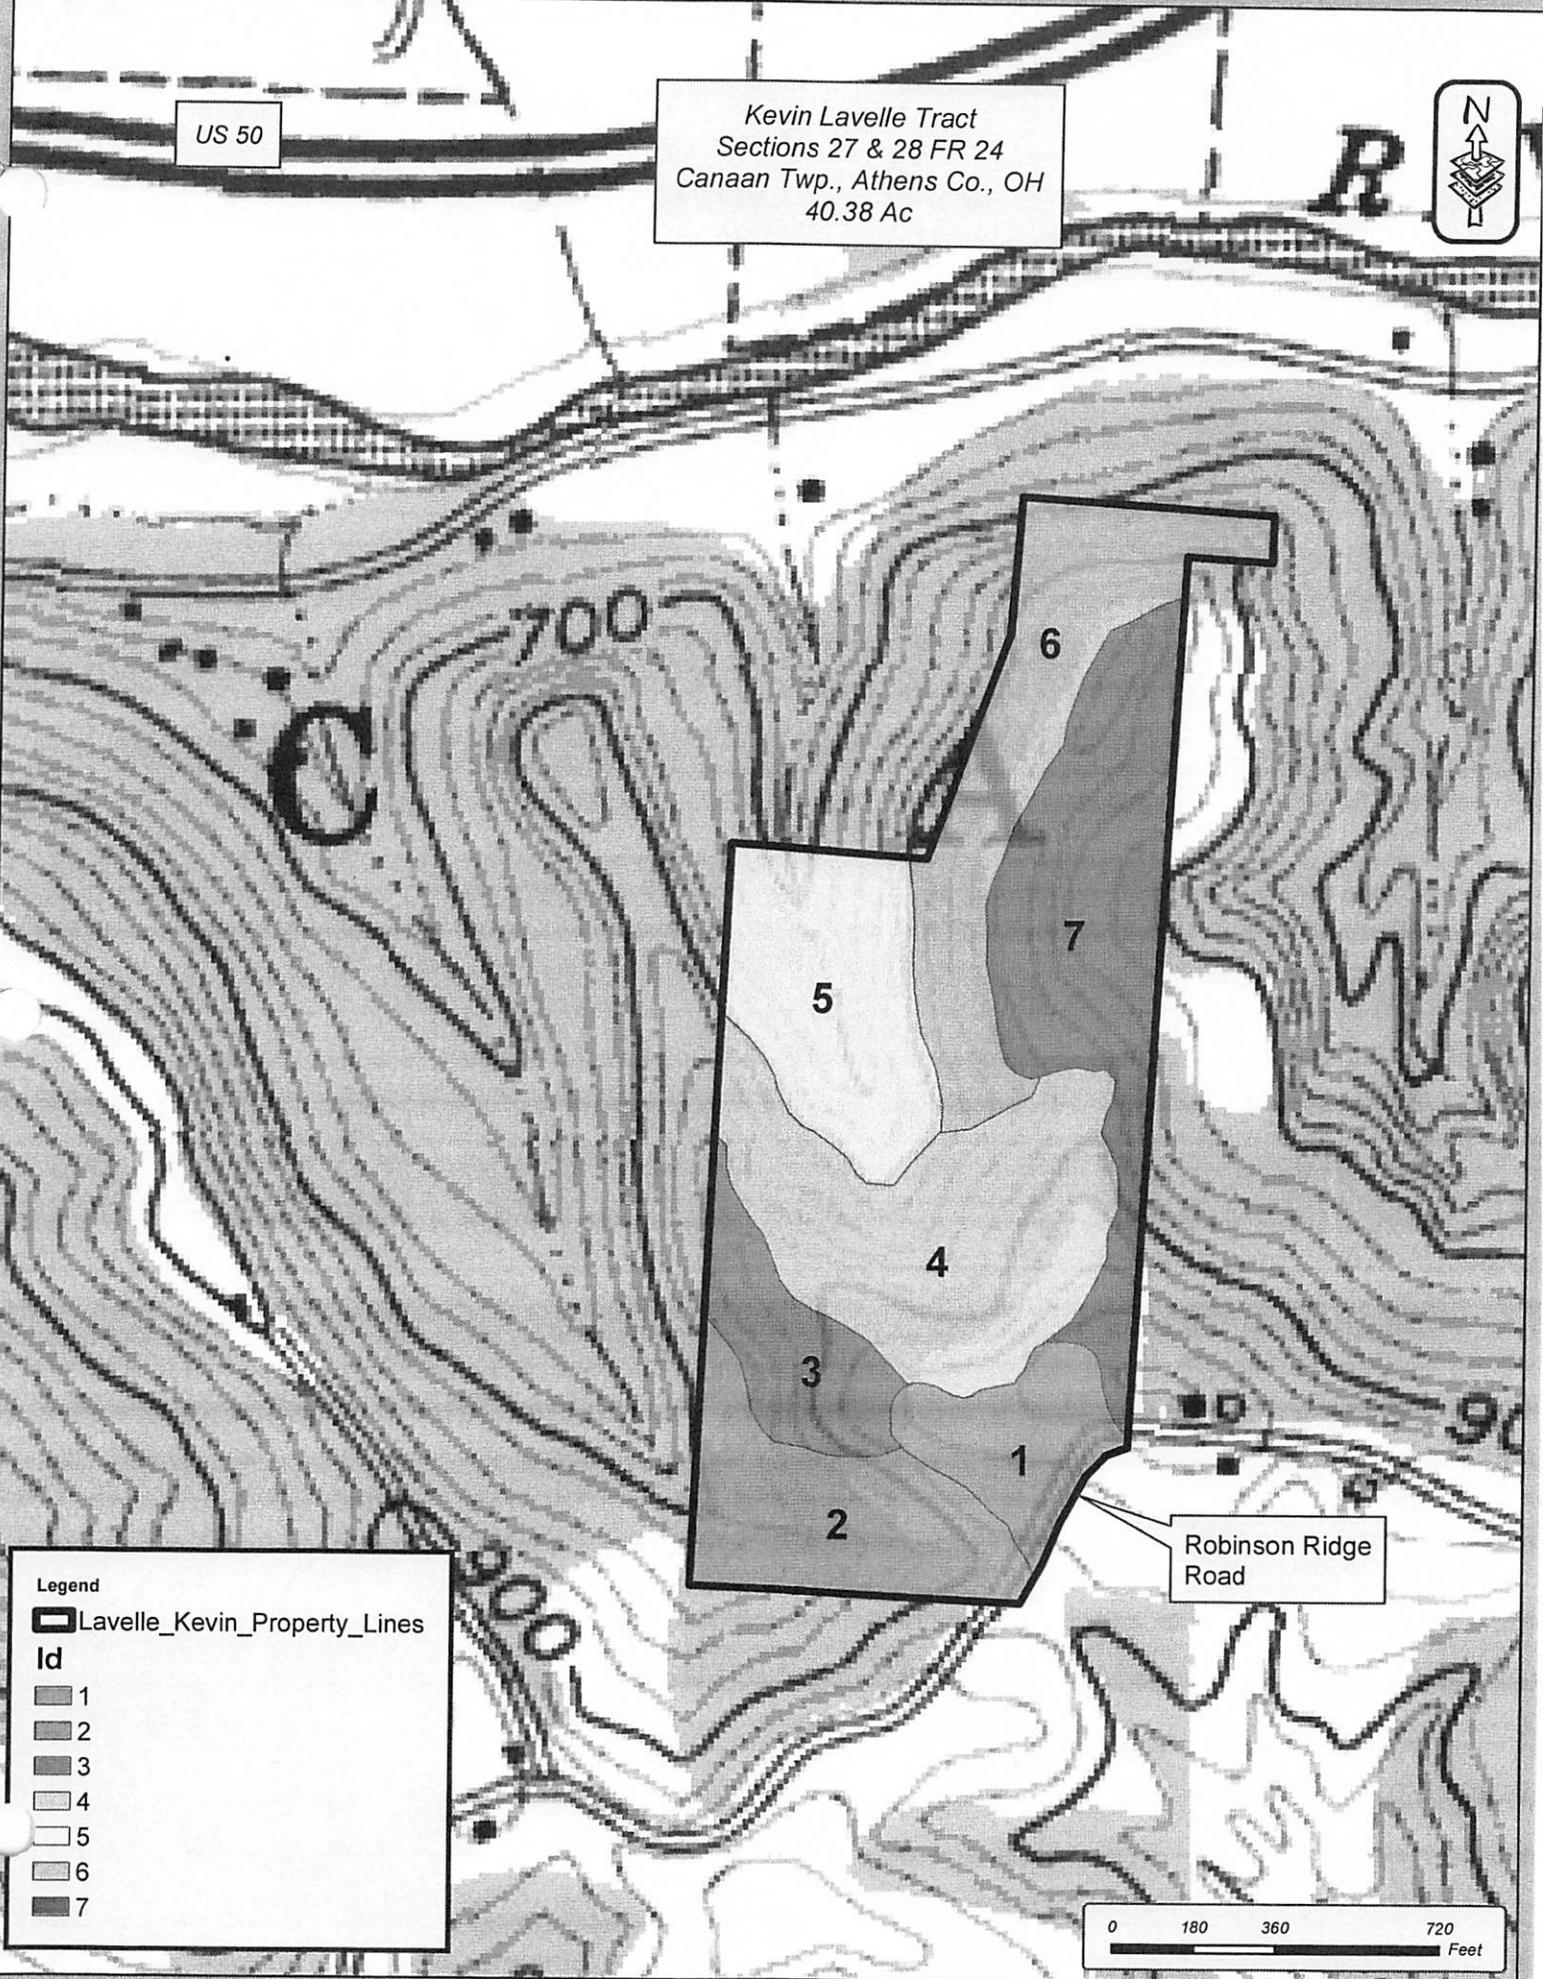

### *General Woodland Description*

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Athens County is in the central hardwood forest region. Major forest types include Appalachian hardwoods, bottomland hardwoods, oak-hickory, successional, Virginia pine, and white pine plantations. Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees.

Kevin purchased this tract in 1982. Soon thereafter they build the house where he currently resides. Kevin has cleared the understory from the wooded area surrounding the house to create a more scenic atmosphere. Historically the majority of this area was cleared for agricultural use or pastured. The woods have been left to develop for the last 50+ years.
