Landowner Management Objectives

1. Protect & manage the property for all attributes and opportunities that exist in a forest ecosystem of interest to the owner including recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. Improve the condition of the woodlands for the benefit of all wildlife species.
3. Utilize the area for recreational activities.

General Woodland Description

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Athens County is in the central hardwood forest region. Major forest types include Appalachian hardwoods, bottomland hardwoods, oak-hickory, successional, Virginia pine, and white pine plantations.

Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees. Pulp, lumber & alternative forest products are important local commodities for Athens County.

Mr. Brown purchased this tract in July 2016 from Mark & Gretchen Hanesworth. This area was timber harvested by the previous owner, various times with the last harvest being in 2012-2013 time period. This acreage was part of the larger Hanesworth farm and had a Plan developed in Sept. 2012 for CAUV purposes.
