

# Woodland Stewardship Management Plan

## Boone Road Enterprises

Owner: Boone Road Enterprises, LLC

Representative: James M. Gresh, Managing Member, Boone Road Enterprises

Signature:  12/3/2020

Prepared by: James Gresh & Ed Romano, Consulting Forester

Signature:  12/3/2020

Signature:  11/21/20

This plan is valid for the period of 06-01-2021 to 06-01-2031

Plan status: New

Owner: Boone Road Enterprises, LLC.

Address: 9135 Gans Avenue NE, Canton, OH 44721

Phone: 330-224-7038

County: Athens

Parcel(s): F01-00100387-00 and F01-00100393-01

Location: Lottridge Road, Carthage Township

Woodland Stewardship Acreage: 59.0 Non-woodland Stewardship Acreage: 1.24

Total Property Acres: 60.24

This plan was written to qualify the landowner's woodland for the CAUV program.

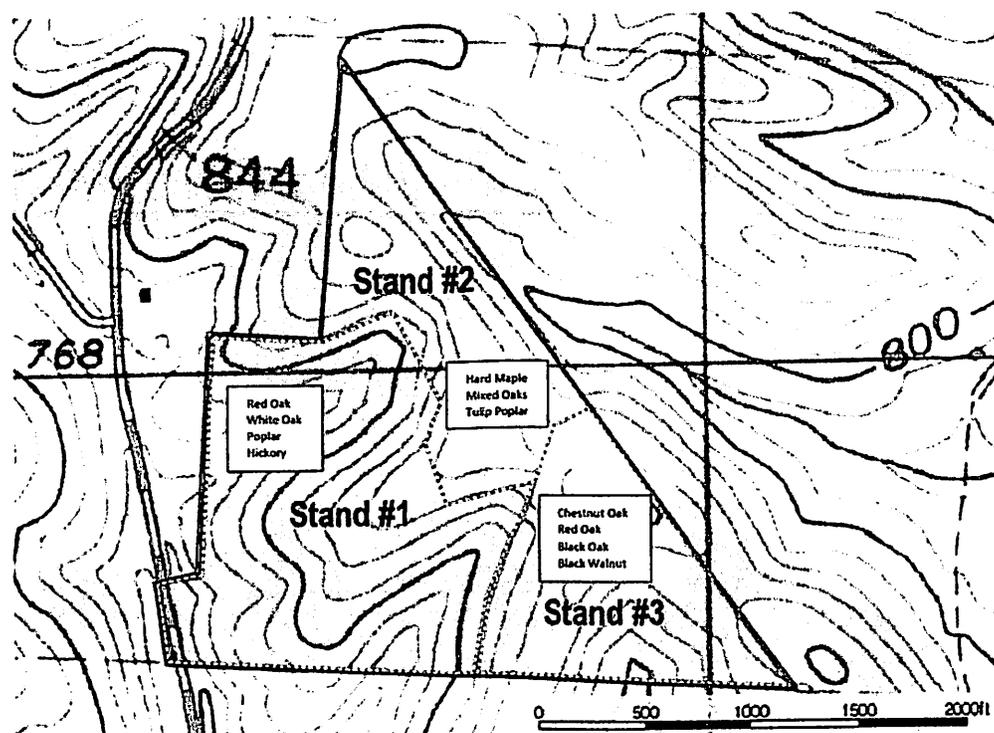

### ***Landowner Objectives:***

1. Conduct ecological forestry with continuous canopy cover, complex structure, and natural regeneration.
2. Achieve a diverse, healthy, and natural ecosystem for trees, plants, vertebrates & invertebrates on this property.
3. Perform small, frequent timber harvests at the increment to support Nature-Based Forestry and produce income.
4. Qualify for the CAUV property tax program.

### ***General Woodland Description:***

The property is a second growth deciduous forest located in the hills of Carthage Township, Athens County, Ohio. The property contains 3 stands of mixed hardwood timber. There has been little to no management of the woodland in the past. Grape vines are present to a light to moderate degree. There is no significant presence of invasive species with, of special note, no *Ailanthus* presence.

The forest has varying conditions throughout the property. Biodiversity is good with respect to tree species; however, coarse woody debris is very limited given the even-age structure of this young forest. Forest structure is mostly even-aged, closed canopy with limited understory; however, some areas are still in early-stage succession. This property contains only ephemeral headwater streams at topographic breaks. Wildlife presence seems healthy but has limited diversity due to the forest structure, lack of wood debris, and site history.

**Management Activity Schedule**

<b>Years Suggested</b>	<b>Mgt Unit</b>	<b>Action Needed?</b>	<b>Acres</b>	<b>Recommendation</b>
2021-2031	all	<input type="checkbox"/> Yes	98	Maintain property boundary markings
2021-2026	all	<input type="checkbox"/> Yes	98	Monitor tree dbh growth
2021-2031	all	<input type="checkbox"/> Yes	98	Light harvests every 2-5 years
2021-2025	2,3	<input type="checkbox"/> Yes	76	Grapevine control
