

Woodland Stewardship Management Plan

Owner Adrian & Lindsay DesJardins
Address 10980 Twist Tail Road
Millfield, Ohio 45761
Phone _____ Case Number _____
Cell 813-240-5364 Email Address adriandesjardins@yahoo.com
County Athens Township/Village/City: Section 10, Dover Twp.
Parcel(s): G010010027901
Location: Located on north side of Twist Tail Road

Woodland Stewardship Acreage: 13.4 Non-woodland Stewardship Acreage*: 1.6
Total Property Acres 15.0 * Non-woodland acres for which stewardship recommendations are made. Stand:1

This plan was written to qualify the landowner's woodland for the programs checked below:

- Ohio Forest Tax Law American Tree Farm Program
 Environmental Quality Incentives Program (EQIP) CAUV Tax Reduction

Property coordinates (report in WGS 84, decimal degrees)

Latitude: N 39.418866 Longitude W 82.079747

Landowner Management Objectives

1. Protect & manage the property for all attributes and opportunities that exist in a forest ecosystem of interest to the owner including recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. To maintain healthy forest by doing timber stand improvement (TSI) activities and working to improve the diversity of native forest plants.

General Woodland Description

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Athens County is in the central hardwood forest region. Major forest types include Appalachian hardwoods, bottomland hardwoods, oak-hickory, successional, Virginia pine, and white pine plantations.

Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees. Pulp, lumber & alternative forest products are important local commodities for Athens County.

Mr. & Mrs. DesJardins reside part-time on this tract. Because they have just recently purchased this tract, few activities have been completed yet (in the woods). This woodlot had been heavily harvested 30+ yrs. ago and the residual stand is a fairly young woods, with some issues with non-native invasive species and grapevines having an impact on the natural ecosystem. The previous owner had begun cutting some of the grapevines. Property lines have been established, corners pinned, and lines blazed and painted with red paint.

Recommended Management Activity Schedule

Year(s) Suggested	Mgmt. Unit	Required Task?	EQIP Practice?	Acres	Recommendations
2022 -2023	all	<input checked="" type="checkbox"/>	<input type="checkbox"/>	NA	Inspect & remark any portions of property lines with paint and signs necessary to help prevent illegal trespass. This task must be completed for this farm to remain eligible for enrolment into the CAUV forestry property tax reduction program.
2022-2027	2	<input type="checkbox"/>	<input checked="" type="checkbox"/>	13	Cut grapevines from all “crop” trees in this stand, cover entire stand – light infestation overall. Some vines have been cut by the previous owner. Leave a few arbore in “junk” trees to provide soft mass for wildlife.
2022 -2032	2	<input type="checkbox"/>	<input checked="" type="checkbox"/>	1	Work on eradicating non-native invasive species- Bush Honeysuckle, Japanese Vine Honeysuckle and possible Japanese Stiltgrass. Conduct annual inspections and eradicate additional infestations any identified.
2022- 2032	2	<input type="checkbox"/>	<input type="checkbox"/>	NA	Maintain trails, install BMP’s where possible.
2027 & 2032	Whole Property	<input checked="" type="checkbox"/>	<input type="checkbox"/>		Next Site Visit – Woodland reviews are recommended at least once every five years, and no more than ten years, based upon the date of the last actual woodland evaluation conducted by your forester

Before entering a timber sale agreement, or conducting other forestry work that is not listed in your activity schedule, contact your forester first to ensure compliance with your approved woodland stewardship management plan.
