### Landowner Management Objectives

1. Protect & manage the property for all attributes and opportunities that exist in a forest ecosystem of interest to the owner including recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. Produce quality forest products and non-traditional products that can be harvested in a sustainable manner. Wildlife habitat improvement is an additional component to the management of this tract.

### General Woodland Description

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Athens County is in the central hardwood forest region. Major forest types include Appalachian hardwoods, bottomland hardwoods, oak-hickory, successional, Virginia pine, and white pine plantations. Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees. Pulp and lumber are important forest products in Athens County.

Mr. Chilcote resides on this tract of land. This property has been in his family since the early 1900's. This wooded tract of land is adjacent to the Wayne National Forest.
