### *Landowner Management Objectives*

1. Protect & manage the property for all attributes and opportunities that exist in a forest ecosystem of interest to the owner including recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. Improve the condition of the woodlands and habitat for game species of animals and birds, primarily white tail deer and wild turkey.
3. Manage the property for long term family ownership.
4. Develop alternative forest products – paw paw, medicinal plants, nuts & berries

### *General Woodland Description*

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Athens County is in the central hardwood forest region. Major forest types include Appalachian hardwoods, bottomland hardwoods, oak-hickory, successional, Virginia pine, and white pine plantations.

Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees. Pulp, lumber & alternative forest products are important local commodities for Athens County.

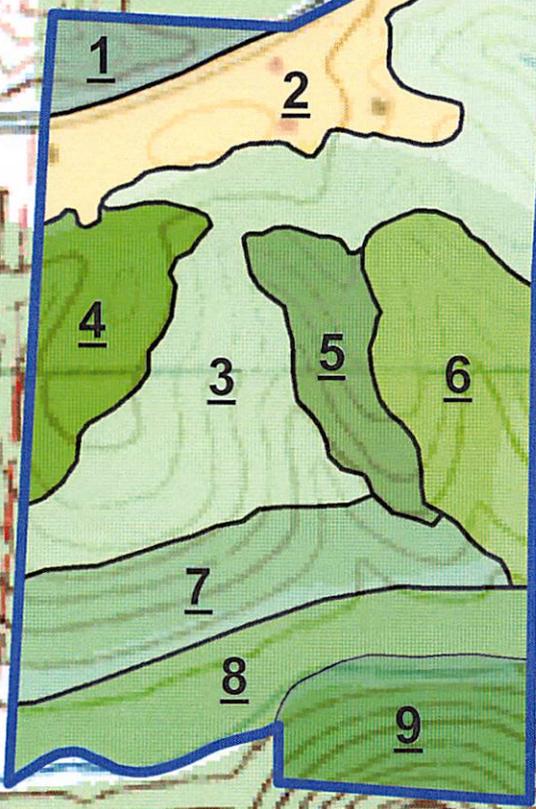

Mr. & Mrs. McClain live on this tract. This tract has been passed down from his Father, who pastured the entire area. Overall, this is a fairly young woods, with some issues with non-native invasive species having an impact on the natural ecosystem.
