

## 2. Property Map, Location, & Description

**Please note:** One or more maps of the property are attached.

### Section 2a—Overview

See the previous forest stewardship plan.

Additions to the overview: 1) There is one **oil/gas well** located on the Orazen property. According to the Ohio Department of Natural Resources online Oil & Gas Well Viewer, this well is called Meek/Jenkins 1 and its coordinates are 39.3365 degrees North and 81.889981 degrees West. The operating company is Energex Power, Inc., 353 East Lincoln Highway, Coatesville, PA 19320, telephone number (724) 622-0093. The approximate location is shown on the attached forest stand map. 2) Also, there is an **underground gas pipeline** that extends through the property, east and west. I don't know its exact route and I have not attempted to map it. I don't believe it's so wide that its area can be considered a separate, non-forest stand. 3) There are **two power line rights-of-way** in the eastern part of the property. These are low lines. Their approximate locations appear on the attached forest stand map. 4) Finally, Ed has recently reported to the county auditor's office **two small buildings** (behind the cabin) as having been **destroyed** or as no longer usable.
