Landowner Management Objectives

1. Manage the property for all attributes and opportunities that exist in a forest ecosystem of interest to the owner including recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. Maintain and improve the productivity of the Sugar Bush.

General Woodland Description

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Seasonal wetness, droughtiness, flood hazard, and the moderately slow to very slow permeability of some soils also limit land use.

Athens County is in the central hardwood forest region. Major forest types include Appalachian hardwoods, bottomland hardwoods, oak-hickory, successional, Virginia pine, and white pine plantations. Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees. Timber and maple syrup are important forest products in Athens County.

Situated in the rolling hills of southeastern Ohio, Sticky Pete's Pure Maple syrup began in 1996 by John Berry and Laura McManus. Presently Laura works a 1500 tap sugarbush. The label was a tribute to their faithful dog, Petey, who was with them through every step of the process, from gathering sap in the woods, to boiling in the sugarhouse, to bottling the delicious golden amber on its way to the market. Sticky Pete's is owner operated. Laura is a member of the Ohio Maple Syrup Association She is dedicated to a quality assured product.
