60 Acres

Area of Forestland:

Property Address & Access

The Rodehaver property is located at the eastern end of Haller Road (Canaan Township Road 538). From that point there is a ridgetop road or trail that runs all the way through the property towards the northeast corner before turning back to the northwest. There isn't any substantial obstacle to managing the Rodehaver property for commercial timber production due to access.

Does the Landowner Reside on the Property?

No.

Nearest City, Town, or Village

The nearest city, town, or village is Guysville, which is located about a mile and half to the east, in a straight line and on the far side of the Hocking River.

Location (Specific)

Stewart, OH, Quadrangle (1961) (USGS topographic map)

Location of (feature): Entrance to the property at the end of Haller Road (approximate)

Latitude: North 39.288 degrees

Longitude: West -81.953 degrees

Projection (Datum): _____

Watershed

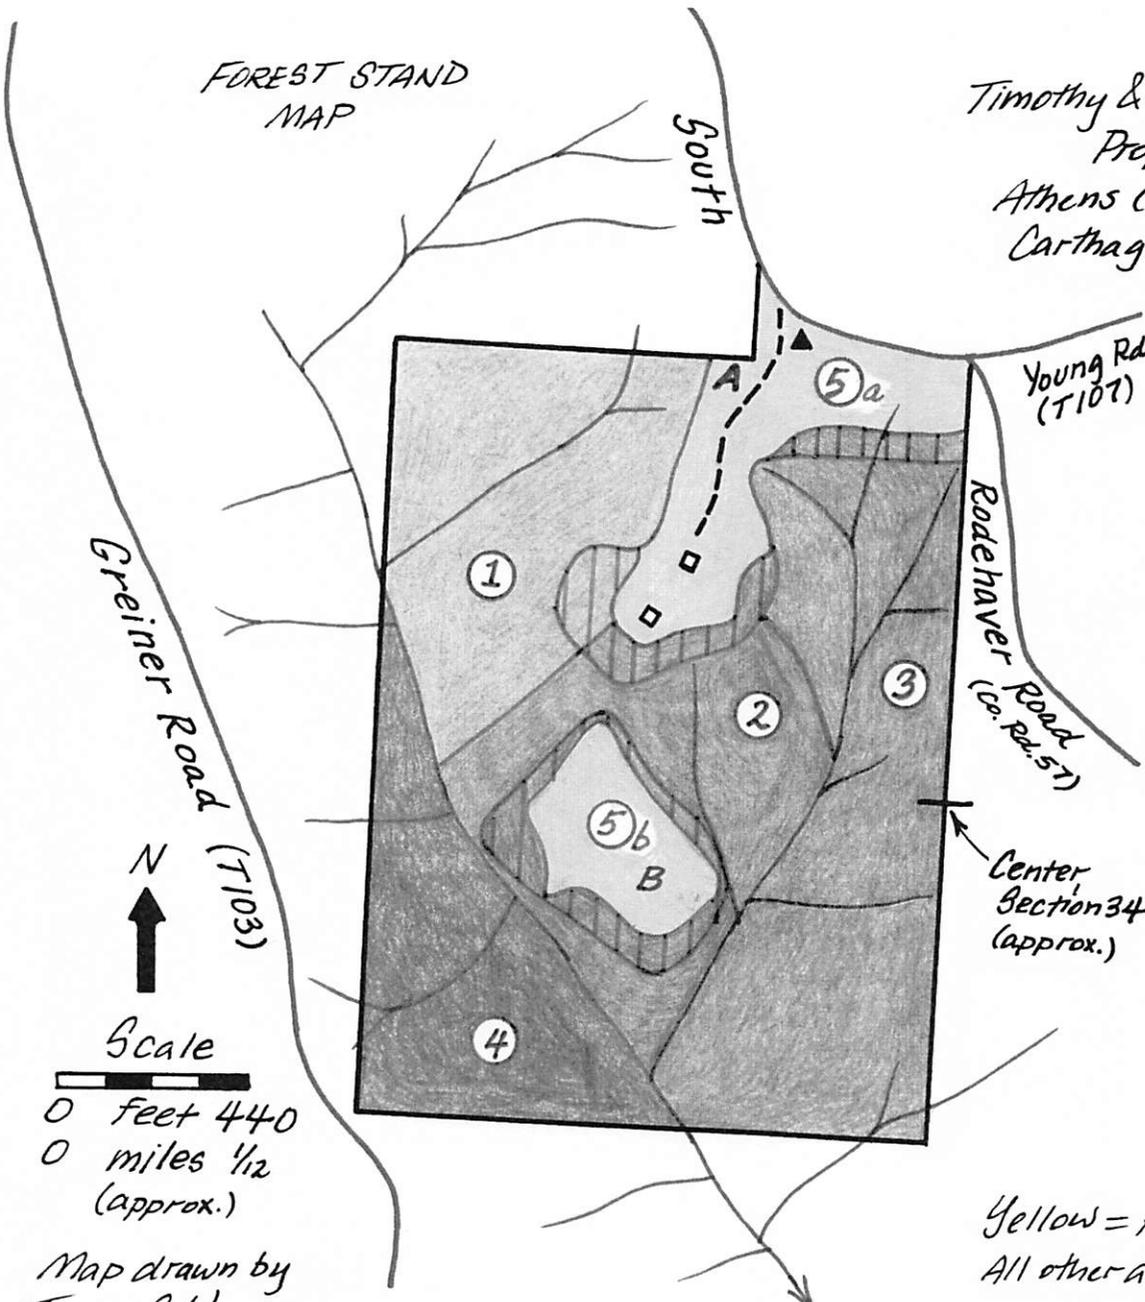

Unnamed streams into the Hocking River, also unnamed streams into Butts Run, which drains into the Hocking River, thence into the Ohio River.

5. Schedule of Management Activities

<i>Years</i>	<i>Stand(s)</i>	<i>Area (Acres)</i>	<i>Activity</i>	<i>Notes</i>
2025-2028	All	56.5	Locate and mark your property boundaries by applying brightly colored paint to trees and fenceposts along the perimeter at a distance of no more than 50 or 60 feet between marks.	
2025-2035	Wherever found	Wherever found	Do your best to eradicate the worst non-native, invasive species, specifically ailanthus or tree-of-heaven.	
2025-2035	Wherever found	Wherever found	Cut, treat, pull, and otherwise control all other non-native, invasive species with a goal of eventual eradication.	
2025-2035	1-4	48.6	Continue cutting grapevines that are growing in timber-producing and mast-bearing trees. You can leave grapevines that are growing in weed trees, scrub trees, non-crop trees, and dead trees. You can also leave poison-ivy vines and Virginia creeper vines, as these do not harm trees.	

2025-2035	1-4	48.6	Undertake timber stand improvement (TSI) work, to include weeding, thinning, crop tree release, and cull tree removal, all with the advice and assistance of a professional forester or well-qualified forestry technician, if necessary. If possible, combine non-commercial TSI with commercial improvement harvesting. If you decide to sell timber, be sure to consult first with a good, ethical, professional forester.	
2025-2035	5 (parts)	As desired	Continue to plant trees in any parts of Stand 5 as you so desire. Be sure to protect and tend your trees until they are well established.	
2034-2035	All	56.5	Update your forest management plan so as to maintain your status under CAUV.
