### Landowner Management Objectives

1. Manage the property for all attributes and opportunities that exist in the natural undeveloped ecosystem, which is of interest to the owner. These include: recreation, wildlife management, soil and water management, forest protection, timber products management, and other compatible conservation uses.
2. Long term forest management with the intent of improving/maintaining a diverse variety of wildlife habitat.

### General Woodland Description

Athens County is located in the unglaciated hill country of southeastern Ohio. Slope and erosion hazard is the major land use limitations. Seasonal wetness, droughtiness, flood hazard, and the moderately slow to very slow permeability of some soils also limit land use.

Athens County is in the central hardwood forest region. Most of the woodland in Athens County is in areas of steep and very steep terrain. This terrain is well suited to trees.

Mr. and Mrs. Lackey acquired this tract on November 2, 2006. This area is primarily wooded and used for recreational purposes. In 2012-2013 this area was harvested along with the adjacent tract (Hardy Tract).
