The line 2.5+3 was run by back and fore sight — a carefully run "transit line". We missed the corner at 8 elm feet to the west. We, therefore, had it set all stakes on our line & the East one foot per thousand feet. I located the stakes at "5" & "82 82½" in their proper places and instructed "Boss" Riser to move the stake at "1055" one foot to the East and the stake at "1937" two feet to the East.

Bearings Corrected to the true meridian at Athens Ohio.
Steele tape & plummet measurement —— Scale 400 = one mile.
